- ☐ Intune Managed Services

## OPTIMIZE HARDWARE MANAGEMENT WHILE IMPROVING SECURITY POSTURE

### Cloud Briefing (Day 1)

In this workshop, an Opsgility expert will brief your team on how Microsoft Intune can help you lower your total cost of ownership by automating the management of identity, applications, and devices (including bring your own device BYOD). We will provide a complete overview of the service's capabilities and common best practices to undertake as it is deployed in your organization.

Our expert will be available to answer technical and business questions about any aspect of the Microsoft Intune service.

### Assessment (Day 2)

After the technical briefing, we will work with you to identify your current technology areas, including your deployed hardware and refresh cycle of existing software and hardware, to help you understand how a migration process would be achieved.

### Cost and Credit

The cost of the workshop is \$2,500. If your company chooses to work with Opsgility as its Cloud Service Provider, the cost will be applied as a credit on any project-based work.
