FOSTER COLLABORATION WITH MICROSOFT TEAMS PHONE

Cloud Briefing (Day 1)

In this workshop, an Opsgility expert will brief your team on how Microsoft Teams Phone provides all-in-one communication, unifying calling, chat, meetings, calendar, and email. This briefing will cover the technical aspects and user experience to help your team decide if Teams Phone fits your unified communications need. We will also review Microsoft Teams Phone compatible hardware options and modern meeting room capabilities to modernize your meetings for hybrid work.

Assessment (Day 2)

After the briefing, we will provide a proposed migration path to Microsoft Teams Phone. This plan will include guidance on deploying Teams Phone, licensing requirements, and an adoption plan with end-user training to help your staff become confident and productive quickly.

Cost and Credit

The cost of the workshop is \$2,500. If your company chooses to work with Opsgility as its Cloud Service Provider, the cost will be applied as a credit on any project-based work.
