STREAMLINE BUSINESS PROCESSES AND INCREASE PRODUCTIVITY

Cloud Briefing

In this workshop, an Opsgility expert will provide your team with an overview of Power Apps and Power Automate, two powerful tools that allow you to build custom business applications and automate business processes. We will showcase the capabilities of the service, including app building, data integration, and automation. Our expert will also discuss common best practices for implementing Power Apps and Power Automate in your organization.

The workshop will be tailored to meet the specific needs of your organization, taking into account your existing infrastructure, data sources, and business requirements.

Assessment

After the technical briefing, we will work with you to identify your organization's specific needs and goals for implementing Power Apps and Power Automate. Our team will help you assess your current business processes and identify areas where automation can be applied to increase efficiency and productivity. We will also work with you to develop a migration plan of existing applications and provide guidance on how to optimize your Power Apps and Power Automate deployment.

Cost and Credit

The cost of the workshop is \$3,500. If your company chooses to work with Opsgility as its Cloud Service Provider, the cost will be applied as a credit on any project-based work.
