GAIN INSIGHTS AND MAKE DATA-DRIVEN DECISIONS

Cloud Briefing

In this workshop, an Opsgility expert will provide your team with an overview of Power BI, a suite of business analytics tools that delivers insights throughout your organization. We will showcase the capabilities of the service, including data modeling, reporting, and visualization. Our expert will also discuss common best practices for implementing Power BI in your organization.

The workshop will be tailored to meet the specific needs of your organization, taking into account your existing infrastructure, data sources, and business requirements.

Assessment

After the technical briefing, we will work with you to identify your organization's specific needs and goals for implementing Power BI. Our team will help you assess your current data sources and identify any data gaps that need to be filled. We will also work with you to develop a migration plan and provide guidance on how to optimize your Power BI deployment.

Cost and Credit

The cost of the workshop is \$3,500. If your company chooses to work with Opsgility as its Cloud Service Provider, the cost will be applied as a credit on any project-based work.
